

Can you measure 1,000 kids in a day?

We can. And here's what else we can do -

✓ **Accurately Measures:**

- height from 27.5" up to 79" in 0.2 increments
- weight from 18 lbs up to 500 lbs in 0.2 increments

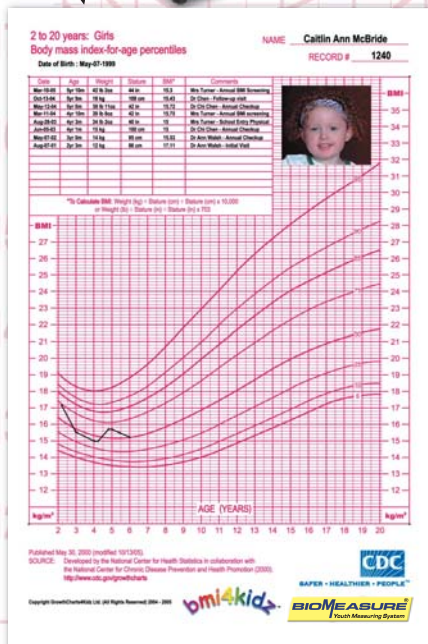

✓ **Instantly calculates Body Mass Index (BMI).**

✓ **Displays data on LCD screen and prints detailed information on customizable printed ticket.**

✓ **Measurements taken electronically, ensuring privacy while saving time and eliminating potential error.**

✓ **RS232 Connection:**

Streamlines measurements via RS232 cable into bmi4kidz software, then automatically calculates gender specific BMI-for-Age and plots the values directly onto official CDC growth charts.
